With a Bachelor of Arts in History from the University of Lagos, my journey in web design has been marked by a commitment to marrying aesthetic form with practical functionality. My work has focused on creating products that resonate with users by ensuring every element serves a purpose.

Experience

UI/UX Freelancer

2023

- Collaborated with the product team to design an intra-organizational complex system; Human Resource Management (HRM) System. This module enabled the effective management of people within the organization, maximizing their performance. The HRM system accelerated and streamlined recruitment, onboarding, performance management, compliance, risk management, and enterprise management, resulting in an overall national improvement of 42%. Build and maintain software documentation sites using various programming languages.
- Assisted in UX reviews for product deliverables across Africa, ensuring a consistent and user-centric design approach.
- Converted Business Requirement Documents into designs and crafted accompanying design copies for each module.

UI/UX Designer

2023

- Collaborated contractually to design a 3-in-1 learning management system. The platform provides a comprehensive ecosystem that integrates learning, job opportunities, and career development to support users throughout their educational journey and professional growth.
- Designed Med-Aid, a medication reminder app to help users stay on track with their medication schedules and improve medication adherence.
- Designed Homely, a smart home management system enabling users to control their smart home devices effortlessly, optimizing their home environment for convenience, efficiency, and functionality.
- Independently designed HomeDoc, a healthcare solution enabling access to healthcare services that may otherwise be difficult to obtain.

Freelance Web Designer

2020-2024

- Developed a responsive platform for seamless parcel tracking and delivery management, featuring real-time updates, a shipping cost calculator, multi-language support, and secure payment integration.
- Built a visually appealing real estate website showcasing property listings, virtual tours, and an advanced search feature to connect buyers and sellers effectively.
- Designed a modern and secure cryptocurrency platform with real-time price tracking, educational resources, and a sleek interface to build trust among users.
- Independently designed HomeDoc, a healthcare solution enabling access to healthcare services that may otherwise be difficult to obtain.
